Detailed Action

1. Claims 1, 3, 5-26, 28-29 and 42-48 are pending.
2. Applicants' IDS filed on 4/1/05 are acknowledged.
3. In view of Applicant's amendment, declaration of K.Kawalchyk and response filed on 4/1/05, the following rejection and objection remain.
4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 20-26 and 28-29 stand rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabled for both heavy and light chain of anti-IFN- α antibody, does not reasonably provide enablement for an anti-IFN- α antibody light chain, an anti-IFN- α antibody heavy chain and a fragment thereof. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims for the same reasons set forth in the previous action mailed 1/28/05.

Applicant's arguments filed on 4/1/05 have been fully considered but they are not persuasive.

Applicant argues that not all six CDRs are required for antigen binding. It was well known at the time of the invention and current state of art as demonstrated by Janeway (Immunobiology, 6th Edition, 2004, Garland Science, p. 110-112). Janeway et al. teach that all of the heavy and light chain CDRs in their proper order and in the context of framework sequences which maintain their required conformation are required in order to produce a protein having antigen binding function and that proper association of heavy and light chain variable regions is required in order to form functional binding sites.

6. Claim 48 remains objected being depended upon rejected claim.

Art Unit: 1644

7. **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

8. Claims 1, 3, 5-9, 11-19, 42-47 are allowable.
